Stocks of Grains

in All Positions

U. S. DEPARTMENT OF AGRICULTURE

April 24, 1959

GRAIN STOCKS CONTINUE RECORD LEVEL

Stocks of all feed grains, wheat and soybeans in all positions on April 1 maintained the recent pattern of record levels. Wheat stocks at 1.5 billion bushels, sorghum grain at 613 million and soybeans at 323 million bushels exceeded the previous records by 17, 44 and 26 percent, respectively. Corn stocks of 3.0 billion bushels were 7 percent above the record level of a year ago and barley stocks were 10 percent larger. Oat stocks of 667 million bushels moved ahead of the record level of 1956 and were 12 percent above a year earlier. Rye and flaxseed stocks each were sharply above the previous year. Stocks of feed grains--corn, oats, barley and sorghum grain--totaled 119 million tons, more than a tenth above the previous record of 106 million tons in storage on April 1, 1958.

Wheat stocks of 1,540 million bushels stored in all positions on April 1 were the largest of record for that date, more than a third larger than the previous year and a sixth larger than the previous record holdings in 1956. The stocks total was 5 percent larger than the record 1958 production with more than four-fifths either owned by the Government or under Government loan. Current stocks were less than January 1, 1959 stocks by 280 million bushels. Off-farm wheat stocks of 1,257 million bushels were a third larger than the holdings a year earlier as stocks increased in all storage positions. Farm stocks at 283 million bushels were more than one-half larger than last year and the third largest of record.

Rye stocks of 18.2 million bushels stored in all positions on April 1 were almost a fifth larger than a year earlier and 33 percent larger than average. Stocks in each storage position were estimated above April 1 a year ago, with the farm stocks proportion of total stocks a near record. Farm stocks at 9.6 million bushels accounted for almost 53 percent of total stocks and were the second largest since 1943. Off-farm stocks of 8.6 million bushels were about 18 percent above April 1, 1958 but only 1 percent above average. Stocks at interior mills and elevators were the fourth largest of record and 2 percent above stocks in this position a year ago. Terminal stocks of 3.4 million bushels were 44 percent above last year but a third less than average. Holdings in CCC bins were a record but still relatively small.

Corn stocks in all storage positions April 1, at 2,992 million bushels, were a new record for the date and 7 percent above a year earlier. April 1 stocks have increased each year since 1952 at an average annual rate of about 200 million bushels. Stocks in interior mills, elevators and warehouses, at 491 million

Washington, D. C.

bushels, were about 91 million above a year ago, but stocks in CCC owned bins at 578 million bushels declined 40 million. Total stocks in off-farm positions were 1,176 million bushels of which about 1,115 million were Government owned or under warehouse loan. Stocks on farms at 1,816 million bushels were 135 million above a year earlier. CCC loans on farm stored corn, including reseals and purchase agreements, outstanding March 31 covered 450 million bushels compared with 360 million on March 15, 1958. Disappearance of corn from all storage positions during the January-March quarter was a record 934 million bushels and well above the 803 million bushels for the same quarter a year earlier.

Oats stored in all positions on April 1 totaled 667 million bushels--nearly 12 percent more than a year earlier and the largest of record for the date. Farm stocks at 588 million bushels were 9 percent higher than a year earlier and above any year of record available back to 1926. Stocks in off-farm positions totaled 79 million bushels, nearly two-fifths larger than a year ago but 7 percent below the record April 1, 1956 stocks. Oats under loan to or owned by CCC amounted to 17 percent of the total stocks compared with 11 percent a year earlier. Disappearance of oats during the first 3 months of 1959 amounted to 382 million bushels--about 16 percent more than during the same quarter in 1958.

The supply of barley in all storage positions on April 1 was a record high of 288 million bushels for the date compared with the previous record a year earlier of 263 million bushels. Holdings on farms were a record 151 million bushels--one percent above a year earlier. Off-farm stocks at 137 million bushels were also a record--21 percent above April 1958. Interior mills, elevators and warehouses held 85 million bushels or 2 percent less than the record a year ago. Terminal elevators held a record total of 44 million bushels. About three-fifths of the April 1 stocks were under loan to or owned by CCC, about the same proportion as a year ago. Total disappearance of barley during the January-March quarter was 102 million bushels compared with 96 million for this period last year.

Sorghum grain stocks in all storage positions April 1 were 613 million bushels, far above the previous record of 425 million for the date a year earlier. Stocks in interior mills, elevators and warehouses, at 382 million, were 151 million above a year earlier and terminal stocks at 126 million increased 29 million. Stocks in all off-farm positions were 510 million bushels of which 497 million were Government owned or under warehouse loan. Farm stocks at 102 million bushels were 5 million above a year earlier with nearly half under CCC farm loan and purchase agreement. Disappearance of sorghum grain from all storage positions during the January-March quarter was 109 million bushels compared with 93 million during the same quarter in 1958.

Soybean stocks of 323 million bushels in all storage positions on April 1 were the largest of record for the date and a fourth larger than a year earlier, the previous record. Farm, terminal, processor and elevator and warehouse stocks were all above April 1, 1958 and record for the date.

1/ Estimates of the Crop Reporting Board.

2/ Commercial stocks reported by Grain Division, AMS, at 44 Terminal cities.

3/ Owned by CCC and stored in bins or other storages owned or controlled by CCC; other CCC-owned grain is included in the estimates by positions.

4/ All off-farm storages not otherwise designated, including merchant mills.

5/ Not available for April 1 prior to 1957.

6/ Firms reporting crushings and stocks of soybeans to the Bureau of the Census.

1/ Includes stocks at Interior Mills, Elevators and Warehouses, commercial stocks reported by Grain Division, AMS, at terminals and those owned by Commodity Credit Corporation which are in bins and other storages under CCC control.

2/ Off-farm total plus farm stocks.

Stocks on April 1 indicate a disappearance during the 6 months, October 1958-March 1959, of 272 million bushels from a supply of 595 million bushels. The supply consisted of a carry-over of 21 million bushels plus the 1958 production of 574 million bushels. During the period 208 million bushels were processed for oil and about 62 million bushels were exported for a known disappearance of 270 million bushels. In addition, soybeans fed probably amounted to at least 1 million bushels. Thus the indicated and known disappearance are in close balance.

Flaxseed stocks in all storage positions on April 1 totaled 24.4 million bushels. This was more than one-half larger than the record low 15.6 million bushels on hand a year earlier. Off-farm stocks of 10.8 million bushels were only a fourth above a year ago but farm stocks were nearly double. Nearly two-thirds of the total stocks on hand April 1 were under Government ownership or loan.

April 1 stocks indicate a disappearance during the period July 1958-March 1959 of 23.9 million bushels from the supply of 48.3 million bushels (carry-over of 8.7 million plus 1958 production of 39.6 million bushels). During the period, crushings amounted to 18.2 million bushels and exports amounted to 4.6 million bushels. This accounts for 22.8 million bushels.

The totals in this report are assembled by the Crop Reporting Board, bringing together commercial stocks at terminals as reported by the Grain Division of the Agricultural Marketing Service, stocks of soybeans at processing plants as reported by the Census Bureau; grains reported by the Grain Branch of the Commodity Stabilization Service as owned by Commodity Credit Corporation and stored in bins, ships, and other storages under CCC control; estimates of the Crop Reporting Board for stocks on farms and at merchant mills and interior mills, elevators, and warehouses.
